FAME

Valued Customer Card

New companies must include approved camera-ready artwork and corporate PMS color numbers. Symbols will not be included unless you provide camera-ready artwork (not business cards). Special fonts should be provided in True Type format on IBM disks.

For best quality results send an uncropped, smooth finish, glossy 3"x5" color print. Digital photography must be on IBM compatible disk in .jpg or .tif format at 300 dpi. See reverse for special photo requirements. Please note that FAME is not responsible for the quality of your photo and does not assume liability for the final print quality of your photo or for the legibility of the card. Due to the nature of computerized graphics and four color process printing there may be a variance in color, normally within +/- 10% (industry standard). A good rule of thumb to follow is the better the photo, the better the card.

Final type and photo position is at the discretion of the typesetter.
